- Phone no: +91 9783981554
- Email: Pawanreyansh5@gmail.com

5 Question and Answers

Q1. Could you please introduce yourself and tell us a little about your shop?
Answer: My name is [Client name], and I run Kanha Beauty & Shine. We offer a wide range of lip glosses, lipsticks, foundations, concealers and other makeup from brands like Maybelline, Swiss Beauty, Mars, Glam21 and Insight.

Q2. How do most customers find your shop? Does not having an online presence make it difficult to reach new customers?
Answer: Most customers find us through recommendations from friends and family. Without an online presence, many new customers may not know about our shop.

Q3. If your shop had a website, what would you like to display on it?
Answer: I would like to showcase our lip glosses, lipsticks, foundations and other makeup products, with the shade colour shown on every product, along with our shop's contact details.

Q4. What would you like to achieve through a website for your shop?
Answer: I want more people to discover our shop and explore our products online, so they can pick their favourite shades and contact us to order.

Q5. How do you like the website we created for your shop? Do you think it could benefit your business?
Answer: I like the website's soft pink design. It will allow customers to explore our products online and help more people discover our shop.

Color and Font Choices with Reasons

1. **Colour Palette:**

Pink Shades : I chose soft pink shades because they give the website a gentle, feminine and stylish look. These colours suit Kanha Beauty & Shine's makeup collection and create a fresh, beautiful appearance.

Main Pink and Dark Pink : The main pink is used for headings, buttons and the active menu link so that important elements stand out. The darker pink appears when a button is hovered, giving clear feedback to the visitor.

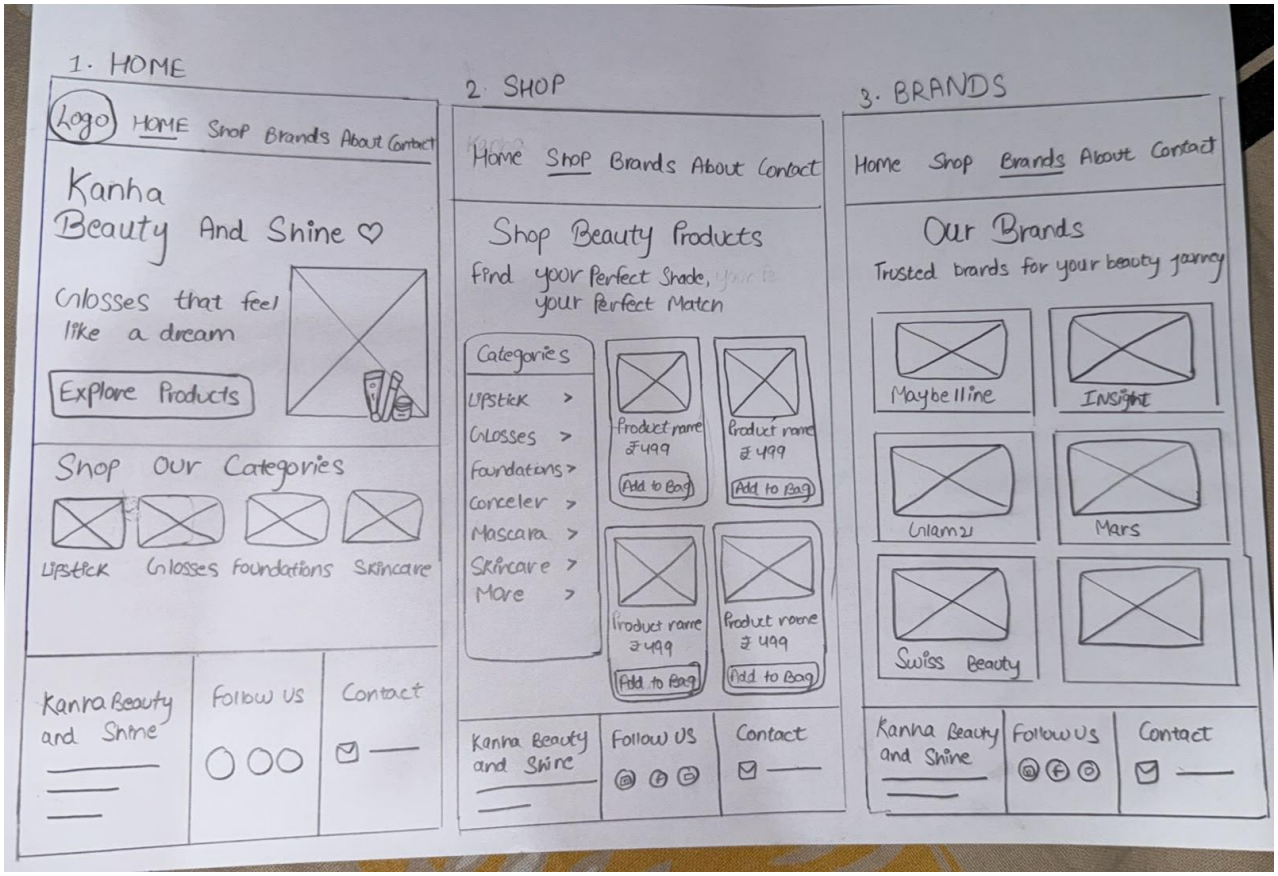

Background and Text : The warm off-white background keeps the page bright and clean, while the dark brown text stays easy to read against it. Grey text and thin border lines are used for small details.

2. Font Choices:

Georgia (Heading Font): I chose Georgia because its elegant serif style gives the website a graceful and premium appearance. It helps the headings and the shop logo stand out and complements the beauty theme.

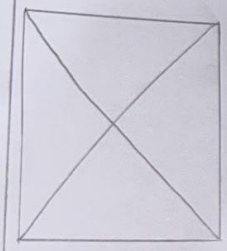

Arial (Body Font): I chose Arial because it is clean, simple and easy to read. It keeps paragraphs, menu links and product details clear while balancing the decorative heading font.
